

# endeavour

level UP your career

The endeavour program is an investment to discover opportunities that fulfill personal satisfaction and professional achievement, along with a clear plan for bringing those opportunities to life.

Career exploration for students and young professionals is shifting away from job search anchored by titles and categories to a broader consideration of what challenges or opportunities exist in the world and where an individual would like to focus their energy and time.

The labour market is growing ever-uncertain. This series will give you the tools to develop the skills and resilience for a successful and meaningful career in the future.

## workshops

All day workshops are facilitated sessions designed for participants to collaborate with peers to explore who they are, their career options, and prepare themselves for a fulfilling future. Three workshop levels build upon each other to create a strong foundation for managing your career.

## one-to-one coaching

One-to-one coaching sessions with a professional career coach give participants the support they need to dive deep into their potential and explore career opportunities. Participants develop job search and career skills that will give them an edge in the job market.

which **endeavour** will you take?
